4 WOODS When the handicap is the same for both players the winner will be the first to reach 21 shots. When the handicap is **different for each player**, the player with the **lower handicap** must score 21 shots to win. The player with the **higher handicap** must score 21 shots **plus the difference in handicaps**. e.g. **Player A** has a handicap of +2. **Player B** has a handicap of +5 **Player A** must score 21 shots to win
Player B must score 24 shots to win
